Write captions for one of the illustrations

1. New cars are very exciting!

2. But talking on the phone while driving is dangerous!

Example

3. If you are not concentrating you might crash into someone!

4. Instead, let someone else answer your phone.

Walking Safety

Always use crossings properly.
At a **pelican** crossing, press the button and wait for the green man before you cross the road.

The **red man** means stop and wait...  The **green man** means go, but check that all vehicles have stopped before you walk across the road. 

At a **zebra** crossing, wait until the traffic has stopped from both directions before you cross the road.

The **lollipop man or lady** will help you cross safely to and from school.

Wait until they stop the traffic and tell you when to cross the road.

Make sure you can be seen.

In darker months wear special reflective clothes or put reflective stickers on your backpack so you can be seen.

Stay close to the adult you're walking with.

Always try to walk with other people. Hold an adult's hand when you're near the road and stay away from the edge of the kerb.

Road Safety

Looking after yourself on the road.

Walking or cycling are some of the most fun ways to keep your body healthy, but if you cycle or walk near a road it's really important that you keep yourself safe.

Roads can be very dangerous so you need to know how to look after yourself when you're near a road.

Always remember the **Green Cross Code** when using a road.

Find the safest place to cross.

Look around for traffic...

...and listen.

Stop before you get to the kerb.

If traffic is coming let it pass.

When it is safe to cross, go straight across the road - don't run.

Cycling Safety

Learn how to ride your bike properly.

Before you ride your bike near a road, make sure you know how to ride it properly and you feel confident.

Make sure you can be seen.

When it's darker, especially in the winter, lights on your bicycle and bright reflective clothing will make sure you can be seen by vehicles and other people using the path.

Keep yourself safe on your bike.

Always wear a helmet when you're riding on your bike.

Cycle only when it is safe.

In many places there are special cycle paths for people riding a bike. Always use the cycle paths and only cycle when it's safe.

You can remind yourself of the Green Cross Code here:
