

Maths Activities

1. 
Measuring

We need to keep practicing our measuring!

I wonder  if you could try  measuring  using  objects  instead of a  ruler?

You could use:  Lego,  tins,  pencils  or hands 

Here are some examples you could try:

How many  cans  are you  tall?

How many  bottles  does it take  to reach  the table  top? 

How many  pencils  wide  is your  TV?

Can you  think  of anything  else you could use  and measure? 

2.  Play  some  maths  games on Topmarks

 I'll  let  you choose  this time!

There are lots of other board games you could play to help your maths knowledge too!
Here are some more ideas!

Monopoly

snakes and ladders

Connect 4

Jigsaws
