

Maths Activities

1. Measuring

This week I want you to practice your measuring skills!

Find yourself a ruler and have a look around the house

You could measure:

- a pencil
- the telephone
- the tv remote
- a cup
- your shoe
- a plate
- your hand

How many cm long are these objects? Do you think you could try and measure them in mm too?

Draw me a table like this with all of your measurements

Object	Estimate in cm	Measurement in cm	Measurement in mm
A pencil			
The telephone			

2. Measurement Investigation

Now that you are a pro' measurer – it's time to do some investigations!

I would like you to tell me which is longer:

- your arm or your leg?
- your nose or your ear?
- a spoon or a fork?
- a piece of bread or a biscuit?
- your thumb or your little finger?

Can you think of any other creative combinations?

3. Play some maths games on Top Marks

You could play *Hit the Button* and choose either 'Number Bonds' or 'Times Tables'
