

Week 5

This week we will be looking at beach habitats. Look through the photos on the PowerPoint that show things that you can find in a beach habitat.

Choose one of the seaside resorts that you have looked at over the last few weeks. Investigate whether the seaside resort that you have chosen has any of the things that you have seen on the PowerPoint. For example, if you choose Newquay see if you can find out if they have any sea caves, is it a rocky or sandy beach, are there any cliffs, etc.

I hope that you have enjoyed investigating coastal resorts and finding out more about the physical and human geography of each place.
