

Understanding the World Activity Guidance

 We  are  learning  about Rainforests.

 Rainforests  are so  important  as they are  home  to  millions  of  plants  and  animals

 Many  of these  plants  and  animals  cannot  be  found  anywhere  else  on  Earth!

 Parts of  the  rainforests  are being  chopped down  to  make  space  for  people

 Chopping down  rainforests  to  make  space  for  people  is  called  deforestation

 What do you think  happens  to the  plants  and  animals  if their  home  is  destroyed?

1.

Watch

the following

video clips

about

rainforests

and

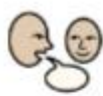

deforestation

<https://www.bbc.co.uk/bitesize/clips/zb2jmp3>

<https://www.youtube.com/watch?v=3Ha6xUVqezQ>

<https://www.bbc.co.uk/teach/class-clips-video/science-ks1-ks2-ivys-plant-workshop-the-impact-deforestation-has-on-plants/zd34hbk>

Talk to

a

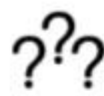

grown-up

about

these

questions:

What

is

deforestation?

Why

does

deforestation

happen?

Is

deforestation

good

for

habitats?

Where

do

the

animals

go

when

their

forests

are destroyed?

2.  
Create a poster!

?     
Can you make an information poster about the rainforests?

  
You could write about:

    
The plants and animals that live in the rainforests

?   
Why you think rainforests are important

 
What deforestation is

    
Tell people to stop chopping down rainforests

      
Use lots of colours and pictures! You could draw these, or print them out
